

Information on starting the implementation of the project "Implementation of the production process of ceramic frit for paints and innovative glass paints"

We are very pleased to announce that we have started the implementation of the project **„Implementation of the production process of ceramic frit for paints and innovative glass paints”** under the Regional Operational Programme of Silesia for years 2014-2020 for the priority axis: III. Competitiveness of SMEs, for action: 3.2. Innovation in SMEs

The main goal of the project is to improve the stability of operations and increase the company's competitiveness in international markets.

Specific objectives:

- independence from external suppliers of ceramic frit,
- introduction of own frit (as an intermediate) to paint manufacturers' markets,
- improvement in the quality of ceramic paints produced,
- introduction of a new type of lead-free thermoplastic inks for glass.

The project assume:

- implementation of the results of own R & D works in the field of production of ceramic frit for paints,
- optimization of all production processes,
- introducing product and process innovation,
- purchase of new fixed assets,
- creation of new jobs,
- entering new markets in Poland and abroad,
- ensuring high quality and environmental standards of production.

Value of the project: PLN 995 964.00

Co-financing: PLN 450 218.00

The deadline for the project implementation: 01/03/2017 - 31/12/2018
